

## Yelpie Portable Safe

Product Name: Yelpie Portable Safe

Manufacturer: -

Model Number: TGS1069

Yelpie is a convenient, weather resistant portable safe designed to store personal effects while you enjoy the great outdoors. Its advanced motion sensor alarm works to keep your valuables exactly where you left them.

Theft at places of leisure like beaches and swimming pools is on the increase. Combine that with the cost of items we use when we re outdoors like MP3 players, sunglasses, mobile phones, cameras and so on, and we have the potential for significant loss. Until now, there has been no product available that conveniently protects against this increasing threat. Enter the Yelpie - a patented lightweight electronic safe that provides portable protection for your valuables.

Its advanced motion sensor alarm works to keep your valuables exactly where you left them, while being smart enough to know what s an accidental bump and what s an attempt to steal your belongings. If a thief attempts to move your Yelpie, a loud 90dB alarm goes off!

How the Yelpie keeps your valuables safe:

The Yelpie is large enough to comfortably fit car and house keys, wallets, MP3 players, mobile phones, sunglasses or other small valuables - but even items too large to be placed inside the Yelpie can be left in public more securely by tying them to the Yelpie: if somebody tries to walk off with your surfboard, the Yelpie alarm will activate!

Perfect for use at the beach, picnics, sporting events, training grounds, swimming pools, gym, school or work lockers, golf course, camping, motor homes, caravans, or when taking the kids for a play in the local park.

How it works:

Step 1: Put your belongings into Yelpie

*Personal Stuff > Car Accessories > Yelpie Portable Safe*

## Yelpie Portable Safe

Step 2: Close and set the alarm

Step 3: Alarm activates if disturbed for more than 2 seconds. Alarm will automatically cease if Yelpie is put down and left alone again.

Step 4: To deactivate the alarm and open the Yelpie portable safe, enter your personal code using the Yelpie's strong and weatherproof keypad. No keys to be lost!
