Loc8ter Lite- Don't loose it, locate it.

Product Name: Loc8ter Lite- Don't loose it, locate it.

Manufacturer: -

Model Number: TGS1124

The multi award winning device that will help you keep tabs on your children, pets and possessions and is ideal for use at home, out and about or for business. We offer 2 different products in the range.

Loc8ter Lite

The Loc8tor Lite is the ultimate locating device to help you keep track of your keys, TV remote and indeed any other valuables. The credit card size handset makes it extremely easy to use where ever it s needed, at home or out and about and guides you directly to your lost belongings.

This credit card sized device can be used to find almost anything which has a homing tag attached to it - keys, cameras, TV remotes, mobile phones, wallets, purses or even the car and with the added convenience of being smaller enough to fit in a wallet.

The Loc8tor Lite is specifically for locating and comes supplied with two Tags.

Unlike anything else currently available the Loc8tor's audio and visual cues from the handheld point you in the right direction and will guide you to the exact location of the missing Tag / item whether it's stuffed down the back of the sofa or left behind in a shop. It will literally take you minutes (even seconds) to find things that would normally have you hunting around for hours and maybe never found at all.

With amazing accuracy you will be guided to within an inch/2.5cm whether you are indoors or out, in complete darkness or in a noisy room.

To find your item, turn around in a full circle then walk in the direction of the strongest signal shown on the handheld – It's as easy as that!!!

What s so special about it?

- * Directional capabilities.
Loc8tor guides where to walk to find lost items.
- * Audio & visual cues on Handset and Tag guide you to within 2.5cm of item.
- * Tags are the smallest and lightest of their kind. Only 5 grams
- * Great Range - Up to 122 meters (clear line of sight).
- * Ultra portable - Handset is the size of a credit card.

Tag Size

- * 30.5mm (H) x 19.5mm (W) x 8.5mm (D)
- * Weight: 5 grams

Loc8ter Plus

The Loc8tor Plus is the multi award winning device that will help you keep tabs on your children, pets and possessions and is ideal for use at home, out and about or for business. Its two modes Locate and Alert enable you to find any tagged lost item even in the hardest to find places and to be warned if an item, pet or child goes outside of your designated safety zone.

The Loc8tor Plus is exceptional at finding and can monitor up to 24 lost items. Directional audio and visual cues from the handheld will guide you to the exact location of the missing tag. It will literally take you minutes (even seconds) to find things that would normally have you hunting around for hours and maybe never found at all. With amazing accuracy you will be guided to within 2.5cm whether indoors or out, in complete darkness or in a noisy room.

Alert Mode

Helps stop things getting lost. It warns you if your valuables, pet or child move outside of your user-set boundary with a vibration alert, audio alarm and handheld displaying which item/s wandered off or has been stolen. Select from 3 preset safety zones - near, medium or far each of which can be further fine tuned to help define the distance required.

Panic Alarm

The Panic Tag (when used in Alert mode) contains a Panic button enabling a child or dependant to call for help. When pressed it activates an Alert Alarm on the handheld advising which child activated the Alarm. This is ideal as a personal alarm for a child or dependent and can be used on a beach, in a park or shopping centre to name but a few.

The Range

183 meter range is based on clear line of sight. Actual range will vary depending on use, environment and location.
