Tocky - A rolling alarm clock with a touch screen core...

Product Name: Tocky - A rolling alarm clock with a touch screen core...

Manufacturer: -

Model Number: PGIFTSO632

Tocky, much like Clocky, is designed to roll off your nightstand and make you get up and chase it in the morning. Sadistic! But this version is spherical, has an outer touch-sensitive dial, records messages and MP3s. It's quite the upgrade!

You may have seen or even own Clocky, Guari Nanda's first rolling alarm clock that runs from you in random directions to get you out of bed. Now, 4 years later, at the New York International Gift Fair, she's released Clocky's updated little brother, Tocky. This one is all 2010: it's spherical, has a touch-sensitive dial, records messages and can play mp3's with its built in mic, and can be driven around with your iPhone (just kidding about that last one).

The product is hot off the presses, but Nanda has already released some how-to videos that demonstrate some of it's cutest features, seen below.
Available in Orange, Blue or Lime

Price: R1,011.15
