

Alcosense ONE - Alcohol Breathalyser

Product Name: Alcosense ONE - Alcohol Breathalyser

Manufacturer: -

Model Number: PGIFTSO665

Low cost, reliable and everyone can afford it. You've got to love the AlcoSense ONE! Entry level yes, but not baseline components. Using MEMS sensors the AlcoSense ONE beats the competition at a similar price point hands down.

AlcoSense ONE

Low cost, reliable and everyone can afford it. You've got to love the AlcoSense ONE! Entry level yes, but not baseline components. Using MEMS sensors the AlcoSense ONE beats the competition

at a similar price point hands down.

Easy to Use

Like it's bigger brothers, the

AlcoSense ONE has been designed to be as easy as possible to use. To do a breath test all you need to do is turn the unit on, wait for it to count down to zero, then blow until it beeps and shows your reading. Easy!

Independently Approved

AlcoSense ONE is one of the

lowest priced products ever to be approved by the US Dept. of Transport Standard for Hand Held Breathalyzers as an Alcohol Screening Device. The US shares the same drink drive limit as the UK but sadly no UK consumer breathalyser approval process or standard exists.

Easy

to Understand Results

Slightly different to the rest of

the range, AlcoSense™ ONE shows your level of intoxication in % BAC (percent of blood alcohol content). It shows your reading in increments of 0.01. The UK drink drive limit is 0.08%BAC. AlcoSense ONE reads up to 0.12%BAC – 1.5 times the UK Limit - above this level it will continue to show 0.12%BAC.

At the drink drive limit the

AlcoSense ONE has an accuracy of +/-0.02%BAC, further away from the limit this accuracy may be less. If you would like your AlcoSense to have greater accuracy throughout the reading range, automatically warn you not to drive if you are near to or over the limit, give more detailed readings or read in mg/l please consider the Lite

or Elite.

New

ZERO™ Technology

The AlcoSense ONE features ZERO™

technology to make sure the unit continues reads at it's best. Using fresh air the user can regularly zero the unit. This greatly reduces 'sensor drift' which reduces accuracy in repeated use - a prolific problem amongst many rival entry-level breathalysers.

Sleek

Design

It's high gloss black design can

Personal Stuff > Mobile Accessories > Alcosense ONE - Alcohol Breathalyser

Alcosense ONE - Alcohol Breathalyser

discretely be kept anywhere. AlcoSense™ ONE measures only 19mm x 30mm x 16.5mm

and weighs only 66 grams including batteries. It is powered by 2 x AAA batteries meaning that you can use it anywhere at any time.

Use it

Again & Again

AlcoSense™ ONE can be used again

and again. For the most accurate results we recommend waiting one hour between tests so the previous sample can fully evaporate from the sensor chamber. If you wish to do multiple tests in a short time we recommend considering the AlcoSense Lite or Elite for their sensor clean and purge features

Highest Levels of Quality

AlcoSense™ ONE meets and exceeds

the US Dept of Transport standard (there is no UK consumer breathalyser standard). Every AlcoSense unit is tested for accuracy three times before leaving our factory. As a result our quality control is arguably the best in the industry meaning you can have 100% faith in our products. AlcoSense™ ONE has industry leading accuracy of +/-0.02%BAC at the drink drive limit, for greater accuracy over the reading range please see the

AlcoSense Lite and

Elite.

Why

Delay?

Part of the responsible enjoyment

of alcohol is to understand its effect on the body and to understand when you are safe to drive. AlcoSense™ helps people do exactly that and takes out the potentially fatal guess work the morning after. Don't leave it to chance, order yours now.
