The easy-to-attach Nite Ize

L.E.D. SpokeLit is the perfect way to increase your visibility, safety, and cool factor when you're riding your bike in the dark. Fueled by an efficient L.E.D bulb, this handy little device has two illumination modes—steady glow and continuous flash—to choose from.

Press it onto the spokes of

your wheel and slide towards the rim until the fit is tight, and it stays securely in place. And, here's the fun part: the SpokeLit not only marks your bike plainly in the dark, when you're riding at medium speed or faster, it creates the attention-getting effect of a moving circle of light.
