Laptop Numeric Keypad - USB

Product Name: Laptop Numeric Keypad - USB

Manufacturer: -

Model Number: GIZMO88

If you work with figures or spreadsheets and need to work on the move, you'll have already found out the limitations of a laptop keyboard, as most of them don't have a separate numeric keypad. If you work with figures or spreadsheets and need to work on the move, you'll have already found out the limitations of a laptop keyboard, as most of them don't have a separate numeric keypad. This means you having to hold down the function key to access the keypad pattern, or use the number keys along the top of the keyboard. While this is a workable option, if you're used to working on a keypad it will considerably slow down your work rate. A better solution is to get a plug in keypad like this latest model from Manhattan. It's a USB device so no drivers are required, and it's also relatively slim so it should fit into most laptop cases. The seventeen keys are full size, with a positive travel and not at all like the cheap keyboards that used to blight budget PCs. It has four non-slip rubber pads on the base and a standard numlock LED indicator on the top; it looks and feels like a quality piece of kit. Features Full-size keys for ease of use 17 keys Ultra-slim and lightweight for portability LED indicator for Number Lock Windows 98SE/2000/Me/XP compatible Lifetime of 10,000,000 keystrokes Lifetime warranty
