## EcoBlast - Rechargeable Air Horn - Sport

Product Name: EcoBlast - Rechargeable Air Horn - Sport

Manufacturer: -

Model Number: GIZMO99

Never buy an expensive airhorn refill canister again! The EcoBlast Sport is a rechargeable air horn. It uses no chemicals and no batteries - just air. Enjoy over 70 blasts per charge! The refillable can will hold up to 6 bar (80 psi) of pressure. This handheld blaster includes its own pump. It meets U.S.C.G. regulations and is a fantastic safety item when boating, biking, hiking, or camping. It is also an attractive item for sports enthusiasts, be them fans, coaches, officials, or referees. The EcoBlast Sport has powerful sound, blasting at 115 decibels! It is small and lightweight, fitting conveniently into a backpack, and can quickly be recharged by the hand pump included. Just pump in new air! The refill valve of the Eco Blast air horn lets you recharge using a Taylor Made Mini Air Pump or any bicycle pump, service station air pump, or air compressor. In seconds, Eco Blast is again ready to emit a powerful 115 dB signal that meets all USCG requirements. EcoBlast beats out chemical horns, too, because it operates in all weather and temperature extremes...can be safely stored or used near a heat source...works in any position...and leaves no rust rings on surfaces. Regular air horn has about 80 blasts from a 12-ounce can - the EcoBlast gets thousands of blasts over its lifetime. And when the old airhorn runs out of air, you have to throw it away as opposed to the EcoBlast, which you simply "recharge" by using a bicycle pump, service station pump, or air-compressor. The EcoBlast also has the ability to be used in all weather conditions, which is a big advantage if you're stuck out on the lake during the winter. The regular air horns usually will not operate below 4 degrees Celcius. Plus, with Eco Blast there's no worry about a potentially harmful chemical escaping into the environment. No chemicals - No batteries Never buy a refill again Need to start a race or stop a game? Powerful 115db sound with inbuilt volume control Recharge quickly & easily with air from most bike pumps or compressors Produces over 70 blasts per recharge Take it anywhere - it's super light at only 100gm Include our Mini pump as an optional extra Perfect for: Sporting events Boating signal Hiking, Biking Bear country safety Wilderness alert system Sport fans Officials Coaches Stadium safe!

**SOLD OUT**
