## Laser Targeting Range Finder

Product Name: Laser Targeting Range Finder

Manufacturer: -

Model Number: GIZMO160

New! Laser targeting function Now there?s something totally new and exiting in the world of electronic distance measuring: the all new SONIN Laser Targeting Range Finder. This tool is unprecedented in its customer appeal. From gadget-lovers to busy do-it-yourselfers to serious professionals, nobody can resist the opportunity to use a high-visibility red laser beam to zero in on all their measurements. The SONIN Laser Targeting Range Finder is an ultrasonic measuring system that allows the user to "mark" the centre of a targeting area and obtain quick and accurate measurements. Just point and press, and the Range Finder measures up to 18 m off a flat surface, providing measurements in feet/inches/fractions, decimal feet, yards or meters. The only limit is your imagination! In addition to the laser targeting capability, this compact unit has a host of important features:

Stores up to seven different measurements or calculations	Computes areas and volumes	Adds and subtracts	Tracking and validation modes	Low battery indicator	Auto-shut-off	Protective pouch
One-year warranty	Class II Visible Laser	Yes	Minimum Measurement Off Wall	56 cm	Maximum Measurement Off Wall	18 m
