Poweriser (50-70 kg)

Product Name: Poweriser (50-70 kg)

Manufacturer: -

Model Number: TGS2144

Here comes the revolution in urban sports. If you are not keen on inline skates and feel too old for a skateboard, try the new Poweriser jumping stilts!
If you think that “jumping stilts“ means special trainers for athletes, you´re wrong. Poweriser is a newly developed mechanical gear that can be attached to your shoes. It allows you to jump two metres high in the air and your dog will have trouble catching up with you, because you can run at the speed of almost 30 miles per hour! Of course, you don´t have to run THAT fast – you wouldn´t have time to look at all the jogging girls properly. But you bet they would look at you, though.
Poweriser has its special features largely due to a special flat spring that reacts to deformation. It uses your own weight and transforms the power created by the movement of the jump into the next rebound. The resulting kind of movement can be somewhat similar to jumping on a trampolin. With a slightly difference still – you can move not only up and down but also to the front.
How to do it
These clumsy hooves (as you might see them at first) are about 16 inches high and are sold in three different sizes (plus one size for the kids) according to the weight of the user. You simply attach them to your shoes or trainers (the harness works in the same way as on a snowboard) and off you go! (Or jump, rather.) We recommend you to have someone close at hand in case you fall but give it five minutes and you´ll be running, hopping and jumping around like a pro.
After a while, when you get more confident, you can try your first jumps and after some time more, you´ll be able to perform some tricks. You see, one can have a lot of fun on the Poweriser stilts – run, hop and jump up and over pretty much anything. If, by any chance, you used to do some gymnastics when you were little, you can even try some flips, backflips and somersaults. Your imagination is not limited and with Poweriser, now you can even dodge the gravity! Poweriser jumping stilts are not strictly for sportsmen/women and sport fans. You can simply walk or jogg with Poweriser but you´ll be faster and more agile and at the end of the month you might easily find out that you´ve lost five kilos! That´s right – with Poweriser you can exercise your muscles in a very easy and entertaining way
