

Powermonkey Discovery

Product Name: Powermonkey Discovery

Manufacturer: -

Model Number: TGS2213

Featuring a state-of-the-art 3500mAh lithium polymer battery, the sleek Powermonkey Discovery offers users real power on the move.

Powermonkey Discovery

Housed in a stylish full aluminium case with 6 high bright pin point LED lights, the powermonkey discovery will recharge an iPhone twice, standard mobile phones 3-4 times, or give iPods / MP3 players up to an additional 120 hours playtime. It is also compatible with e-readers, Sat Navs, handheld games consoles, portable GPS systems and more!

The recessed LED lights indicate the power stored in the unit (6 green lights show the unit is fully charged) and when unit needs to be recharged the last LED will turn red. Recharge the powermonkey discovery via your computer's USB port. Control of the powermonkey discovery is via the metal on/off button located at the top of the unit, whilst the USB port has built-in self-sensing technology which allows the unit to optimise the charging parameters for the iPhone and other smartphones.

The discovery has been optimised for weight, size and performance, measuring just 114 x 13 x 46mm and weighing 107g - approximately two thirds the size of the iPhone 4.

One of the major new features of the powermonkey discovery is the exciting ability to brand the unit for corporate events, promotion and incentive markets by companies supplying a graphic and message of their choice to be printed on the unique cover plate.

The discovery is packaged in a crystal retail case allowing the unit to be viewed by the customer prior to purchase.

Please note, iPhones and iPads will require the USB sync/charge cable supplied by Apple.

Kit Includes
