## LED Lenser P3

Product Name: LED Lenser P3

Manufacturer: -

Model Number: TGS2380

These lamps are technological dynamite. Their core piece is the Advanced Focus System and lens technology. A double-shell reflector-lens allows for stageless transition from broad floodlight to a sharply focused long-distance beam. The initial appeal of the new LED LENSER flash lights lies in its grace and dynamic elegance. But what's inside the beautiful housings is even more enthralling: These lamps are technological dynamite. Their core piece is the Advanced Focus System (starting with LED LENSER® P5). This lens technology, represents a milestone in the history of artificial light.

Press the push button gently to make the white beam of LED LENSER® appear before your eyes like a cathedral of light. A double-shell reflector-lens (patent pending) allows for stageless transition from broad floodlight to sharply focused long-distance beam. Most of these lamps are equipped with a new generation of 3 watt chips. LED LENSER® P3 is the twin brother of LED LENSER® P2, but due to its bigger lamp head, it has an increased lighting range. The Blue Moon Focus System allows for quick transition from circular low beam to focused longdistance light. The lamp's ergonomically perfect clip is as convincing as its battery concept: one AAA alkaline battery that supplies power for many hours of light.

LED 1 x Nichia High End

Length 94,5 mm

Weight

42 g

Luminous

flux 13 lm\*

Batteries 1 x AAA

Energy

tank\*\* 1,8 Wh

Burning life

6,5 h

Beam Range 31 m

**Price: R202.80**
