LED Lenser P5

Product Name: LED Lenser P5

Manufacturer: -

Model Number: TGS2381

These lamps are technological dynamite. Their core piece is the Advanced Focus System and lens technology. A double-shell reflector-lens allows for stageless transition from broad floodlight to a sharply focused long-distance beam. The initial appeal of the new LED LENSER flash lights lies in its grace and dynamic elegance. But what's inside the beautiful housings is even more enthralling: These lamps are technological dynamite. Their core piece is the Advanced Focus System (starting with LED LENSER® P5). This lens technology, represents a milestone in the history of artificial light.

Press the push button gently to make the white beam of LED LENSER® appear before your eyes like a cathedral of light. A double-shell reflector-lens (patent pending) allows for stageless transition from broad floodlight to sharply focused long-distance beam. Most of these lamps are equipped with a new generation of 3 watt chips. The LED LENSER® P5 is small, lightweight, an energy-saving marvel and at the same time a giant of brightness. It is operated with only AA battery. Each nanosecond, the built-in DC/DC converter pumps energy through the high-performance LED (Cree, 3 watt). The result is quite impressive and exceeds the light output of (conventional) electric torches that weigh more than ten times as much.** The focusing system (Advanced Focus System) is as convincing as the one-hand operation mechanism (Speed Focus).

LED High End Power

LED

Length 113 mm

Weight 84 g

Luminous flux

105 lm*

Batteries 1 x AA

Energy tank

4,2 Wh

Burning life

3 h**

Beam range

130 m*

Price: R538.80

Availability: This product was added to our catalog on Monday 28 July, 2014
