ROBOSAPIEN Limited Edition Chrome Blue

Product Name: ROBOSAPIEN Limited Edition Chrome Blue

Manufacturer: -

Model Number: Robo4

About ROBOSAPIEN™

Loaded with attitude and intelligence, Robosapien is the first robot based on the science of applied biomorphic robotics.

Designed by a scientist, Robosapien is ready to go right out of the box (just install his batteries). He comes to life at a touch of the ergonomically designed remote controller! Command him to perform one of his pre-programmed functions or program your own sequence of functions.

The only limitation is your own imagination.

About Robosapien:

Robosapien is packed with an awesome number of features made possible by advanced technologies:

Fluid motions and gestures: fast dynamic 2-speed walking and turning; full-function arms with two types of grippers.

67 pre-programmed functions: pick-up, throw, kick, dance, kung-fu, fart, belch, rap and more; 3 demonstration modes.

Fully programmable by remote control: Up to 84 program steps with 4 program modes for advanced operations; programmable "reflexes" to sound and touch stimuli.

Fluent international "caveman" speech.

Extended battery life.

About Mark Tilden:

Mark, the designer of Robosapien, is a robotics physicist who has worked for NASA, DARPA and JPL through Los Alamos National Laboratory. He developed the basics for biomorphic robotics in 1988; Robosapien is the first commercially available robot based upon this principle
