## ROBOSAPIEN V2

Product Name: ROBOSAPIEN V2

Manufacturer: -

Model Number: Robo6

About Robosapien™ V2

Robosapien V2 brings the fluid movement and biomechanical agility of Robosapien to a whole new level. Gaining a whopping 10" in height (making him almost 28 inches tall!) Robosapien V2 now has full range of motion and the ability to pick up, drop and throw objects with his finely tuned precision hands. Advanced agility allows him to bend over and twist from side to side, so he can now sit, bend, lie down and stand up. He can even stand from a prone position all by himself! Robosapien V2 will interact with his surroundings, and can even talk! Fully equipped with infra-red radar vision, Robosapien's V2 moving eyes with blue LED lights can detect obstacles, track movements and take objects handed to him.

Sensory features include a vision color system that enables Robosapien V2 to recognize objects and skin tones; he can wave when he sees you and reach out to shake your hand. A stereo sound detection system allows him to respond and react to noises in the environment. Robosapien V2 comes equipped with "laser" tracking; trace a laser path on the ground and he'll follow it. Robosapien V2 is so advanced he can even control his new friends – Roboraptor™ and Robopet™.
