Uberorbs

Product Name: Uberorbs

Manufacturer: -

Model Number: pgg224

Uberorbs are set to become the hottest new stress relieving gizmo/desktop plaything, and are so enthralling you'll forget your worries, your work and everything else in between. Try pulling the Uberorbs apart and holding them on your desk with the tips touching. Then let go. What happens next is truly mesmerising and the first time you witness it you may emit a somewhat amazed yelp. We know we did! Upon releasing the Uberorbs they immediately perform a manic magnetic ballet of attraction and repulsion; clashing, spinning and making a spookily unnerving insectoid chirping sound in the process (our musical friends tell us this is called a 'glissando'). Initially, this fascinating phenomenon is startling, but after a few goes you'll be totally hypnotised and unable to put them down. There are numerous ways you can play with Uberorbs and their extremely magnetic properties combined with their aesthetically pleasing and tactile shape will have you playing with them absentmindedly for hours on end, a bit like modern day worry beads. Tips and tricks To start off, hold the Uberorbs in the palm of one hand. Using your thumb, separate them to about one centimeter apart. With a bit of practise, when you release them they will produce a fascinating sound. Try pinching them onto your middle finger, separate the ends with your thumb and middle finger and release to produce a beautiful glissando. Clasp the Uberorbs between your thumb and first two fingers. Squeezing gently will spin them briefly in the air, producing a musical whistle. Try spinning them from one hand to the other. Balance the Uberorbs by holding one above the other. Move the top one downwards slowly until the bottom one can stand on its own and swing like a metronome. Try hanging one Uberorb from another to create a pendulum.
