Manufactured in SA

Pricing reduces as quantity increases

Our 2 layer washable fabric face masks are available as unbranded and with full colour sublimation branding as well. The front layer is a 180gsm moisture management breathable polyester fabric and the second layer is a 50gsm non-woven fabric. The polyester fabric assists in repelling moisture and the non-woven fabric is used to enhance the barrier function of the mask and assists in inhibiting the transfer of small particles.

Our 3 layer washable fabric face masks are also available in unbranded and full colour sublimation branding. The front layer is a 180gsm moisture management breathable polyester fabric, the second layer is a 50gsm non-woven fabric and the inner layer is a 145gsm cotton.

Masks can be disinfected by washing in hot water and soap and preferably being ironed. (Source: NICD. <https://www.nicd.ac.za/>)

We have done extensive research into the manufacture of our washable fabric masks to ensure they adhere to the requirements set out by The National Institute for Communicable Diseases(NICD). You can read more here <https://www.nicd.ac.za/diseases-a-z-index/covid-19/covid-19-guidelines/>. In parallel, we have retooled our factory and made sure the environment in which our staff will work is safe. We have also ensured that the products you collect from us are safe for you and your client to handle.

Please remember that a fabric face mask is only part of a broader solution to curb the spread of COVID-19 and it must always be used in combination with other hygienic methods of prevention. Masks can be disinfected by washing in hot water and soap and preferably being ironed. (Source: NICD. <https://www.nicd.ac.za/>)
