Green laser Pointer 30mw

Product Name: Green laser Pointer 30mw

Manufacturer: -

Model Number: PGIFTSO492

The laser is great for use in astronomy, laser shows, and general hobbyists. At night, it creates a solid green line in the sky as far as the eye can see. Okay, just about everyone has a red laser pointer. But, we're pretty sure you want to be a superior geek - and doing it with a green laser is the way to go. This pointer is significantly brighter (about 50 times) than a red laser pointer and because of its unusual color it is much more noticeable. I mean come on, a 532 nm green laser wavelength is obviously superior to a laughable 650 nm red laser wavelength. And unlike a red laser, the green beam itself can be seen in mid-air in dark conditions, not just the laser beam dot. This allows the green laser pointer to be used for pointing to star constellations (skypointing) and also just generally look cool as hell.

The green laser beam dot can be seen at much greater distances than with a red laser pointer. Green Laser Pionter 50mw Features: * This laser pointer is significantly brighter (about 50 times) than a red laser pointer, utilizing the very latest technology in green laser. * The brightness and green color comes from a wavelength of 532 nm, it makes more noticeable than other laser colors. *

Output Power <50mw (class IIIb) * Wavelength: 532nm * Operation Current: <250ma * Beam Diameter: 1.5mm * Beam Divergence: 1.5m/Rad * Operation Lifetime: 3000 - 5000hours * Power output: 2 x AAA * Weight: 200g * Distance range : 5000m Legal and Safety Disclaimer: Laser pointers are Legal for General use providing they conform to <5mw. Powerful laser pointers can be very dangerous to eyes. We are in no way responsible for the actions of a purchaser and to which use they put our products, we cannot be held liable for the "Potential Misuse" or "Misuse" (such as point a laser at any aircraft) of any product sold by us. Laser pointers are legitimate Business and research tools ... not Toys. We always and firmly support the local law for importing dangerous products. The purchaser should support laser safety and laws against the malicious misuse of lasers.
